

FOOD TRANSFER UNIT

These units are for transferring food products such as glucose, confectionery, vegetable oils, syrup, honey or similar products. They are motor-pumps made from food-grade synthetic materials.

They are self-contained and mobile with a gripper bar to facilitate handling.

They can also be supplied with a metering module allowing the programming of the precise volume to be transferred.

Discharge up to 830 liter/hour.

These pumps are fitted with :

- Stainless steel support plate
- CMtec-type motor-pump made of synthetic materials
- Electrical box

OPTIONAL EXTRAS

- Metering module
- Flexible hose with gun and pressure switch
- Volume flow meter
