PERFORMANCE

Pollard lubrication pumps cover a large range of hydraulic performances, available with a large variety of design adaptations and optional features .

Pump rotation speed	up to 3000 rpm <i>(depending on model)</i>
Differential pressure	up to 30 bar <i>(depending on model)</i>
Mounting	Externally mounted: threaded or with SAE flanges Cartridge type: integrated inside the frame of the gearbox
Dimensions	Standard or Customized: Thanks to an easily adaptable CMtec technology, Pollard offers direct drop-in pumps, interchangeable with other competitors' pumps.
Design	Bare-shaft pump or complete electric motor-pump .
Options	Coupling adapted on demand. Bypass and non-return valves available on demand.

POLLARD PUMPS' INTERCHANGEABILITY MAPPING
